## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-17 are allowed.

The following is an examiner's statement of reasons for allowance: None of the prior art shows the syringe comprising the ventilation means as claimed. Regarding claims 12-16, none of the prior art shows or suggests the pusher operating portion having an abutment portion which functions to abuts the base end portion when the plunger shaft stroke length is small, which prevents the gasket (piston) from being pushed to the tip end of the barrel portion. Conversely, when the length of the pusher is large, the gasket can be pushed to the tip end portion of the barrel. Claim 14 points out that the pusher-operating portion comprises an elastic piece.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
